

PRACTICAL GHG ACCOUNTING

Scope 1,2 & 3

By the end of this training, you will be able to:

- Calculate your company's Scope 1, 2 & 3 emissions
- Build a GHG inventory using your operational data
- Do calculations on pre-set GHG inventories
- Familiarize relevant standard - GHG Protocol, ISO 14064-1
- Prepare carbon emission graphical representation as required
- Identify major emission hotspots
- Establish a baseline for future reduction targets

Led by Pn. Putri Razreena
Certified GHG Practitioner who has
experience in environmental expertise
for over 29 years

Who Should Attend?

- Sustainability managers and executives
- HSE officers, EHS manager
- ESG team and consultants.

RM 3600
*FREE for
eligible SME

Included

- Training material
- certificate
- morning break, lunch & tea break

Increasingly, customers, investors and regulators require organisations to quantify and report greenhouse gas emissions. This workshop equips participants with the practical skills to produce credible carbon inventories.

BOOK NOW

***Subject to HRD Corp Approval and final participant confirmation**

Day 1: Learn the basic know-how: accounting (quantifications) and reporting.

Day 2: Identify GHG sources and apply the quantification methods

Day 3 : To establish baseline and track the GHG emissions

"Transformed our ISO 14064 approach—
highly recommended!"
